Dear [Hiring Manager name / Hiring Team],

I am applying for the [Role] position at [Company]. [One sentence on why this company / product: what problem they solve and why it matters to you.]

I have spent 8+ years building products in Retail & E-commerce and FinTech: omnichannel POS at Haravan, social commerce at UNA Market, a B2B2C merchant app at FinViet, and now a group-buying platform at PIGROUP. Two points are most relevant to this role:

- **[Requirement 1 from the JD]:** [Matching evidence, e.g. “At FinViet I scaled the merchant app to 320K+ users and 90K+ MAU (4.5x) while bringing payments and lending into the app.”]
- **[Requirement 2 from the JD]:** [Matching evidence, with a number or a concrete outcome.]

I also work hands-on with AI. I use it to speed up discovery, documentation and prototyping, and I have shipped my own products to the Chrome Web Store, App Store and Google Play. Case studies are at reddang.github.io.

I would welcome the chance to discuss how I can help [Company] [goal from the JD]. Thank you for your time and consideration.

Best regards,
**Quang (Red) Dang**
